

SAM meeting week 5

Deadlines

- 16 December – Assignment 1 Task 1
- 23 December - Assignment 1 Task 2
- 23 December – Code delivery

Feedback/Decisions

- Forbidden exception 401 instead of bad request on authentication error
- Decide on a deadline on Sunday for merge requests as to give time to others to check them
- Strategy Design Pattern could be used even if all of the strategies are not used simultaneous
- Meeting online on 20 December 1:45-2:15
- Publisher and controllers should be connected in the context diagram
- Change the tag of microservices into subsystem in the context diagram
- Everything else that is not a subsystem should be a component
- Assignment 1 task 1 and task 2 should be tagged in gitlab
- Add the square notation in the context diagram
- Write boundary tests
- We can create an environment on postman and post it on gitlab to make tests easier
- Naming of classes should not be a problem
- Communication between microservices and databases should be tested using mocks
